MEMORANDUM FOR: Chief, Forces Division, ORR

ATTENTION :: [REDACTED] 25X1A

THROUGH : Chief, Requirements Branch,  
Reconnaissance Group, CGS

SUBJECT : Substation near DOGHOUSE,  
Narofominsk, USSR.

REFERENCE : CIA Requirement C-RR5-82,939  
(NPIC Project 11192-6)

1. This memorandum is in response to your requirement which requests analysis and mensuration on the substation under construction near the DOGHOUSE in the vicinity of Narofominsk, USSR.

2. Photo analysis of this substation on [REDACTED] reveals two dark objects positioned where step-down transformers are normally located between the identified 220-kv switching yard [REDACTED] and the low-voltage extension of the Control and Low-voltage Switching building and adjacent to the servicing railroad track which passes through the identified Transformer Maintenance building.

3. The definition of these two dark objects is so poor that:

- a. It cannot be determined whether transformers or only conductors-support framings have been installed at both sites;
- b. It cannot be determined whether one (1) 3-phase transformer or a bank of 3 1-phase transformers are to be or have been installed at either site. However, it can be stated that the two installations will probably have similar transformers.

DECLASSIFICATION REVIEW by NIMA/DOD 4/25/00

GROUP 1  
Excluded from automatic  
downgrading and  
declassification

TOP SECRET RUFF

TCS-12454-65

4. The poor resolution does not provide sufficient clarity to enable definitive points suitable for mensuration with any degree of accuracy to enable a range of millivolts-ampere (MVA) capacities to be determined.

5. This project is considered to be complete.
